Audiometer Keyboard

Audiometry made comfortable

The Audiometer Keyboard from Interacoustics is a dedicated keyboard for audiometry that you can use alongside your regular PC keyboard. This makes it easy to integrate into your current workflow and allows for a smooth transition to a PC-based audiometer.

Improve your working life with little effort

With a short learning curve, you will learn how to use the Audiometer Keyboard in no time. This will allow you to focus on your patients rather than

the technology. To get started, plug the keyboard to your PC via USB and you are ready to test. You can also tailor the buttons to your specific needs and preferences.

Easy to fit into your clinic

Even in small or crowded clinics, the Audiometer Keyboard's small footprint will allow you to use it without taking up too much space. When not in use, you can store it in a small space.

Patient-centered design

The touch and feel of the ergonomic

keyboard helps to keep focus on the patient, whether in an adult or a pediatric setting, providing reassurance for clinicians and patients alike.

Designed to reduce the risk of infection

The Audiometer Keyboard's materials and surfaces are easy to clean, reducing the risk of infection. You can quickly wipe down the device after each use, ensuring it stays clean and hygienic.
